WHAT IS EDS?

HAT Collective empowers our dealer and design community to select from our product portfolio according to their project timeline, application and priority. HAT Collective delivers on helping our customers fulfill last minute requests from our in-stock program and is always competitive with our standard product offering. And, when the request for a more customized or modified product design arises for a client, that's when our team really shines. HAT Collective has the options and the answers with our Enhanced Design Solutions (EDS) division.

Our insightful HAT Collective EDS design and engineering team exists to work along side the customer with very specific needs. From a simple product color change to iterating on a fully "built for purpose" solution, the EDS experts are ready to collaborate, execute and achieve the newly designed product vision.

EDS EXPERIENCE

Our customers work with a dedicated HAT Collective designer alongside both our Pennsylvania based and Danish design + manufacturing team to help achieve a customer's vision for any product.

The EDS experience:

- Easy customization
- Danish aesthetic & manufacturing
- In-house design and engineering
- Outstanding global service
- Any combination of products

Unlike *any* other manufacturer, our clients get direct access to our design team - full collaboration and transparency. A fluid process from start to finish.

EDS ARC OF SELECTION

When functional design is paramount and your customer is looking for a very specific product solution to support their work environment, the Enhanced Design Solution route is a great way to go.

There are three EDS levels of selection:

- 1 Custom colors
- 2 Custom size or shape
- 3 Engineering product to fit into existing system

1 Ellehaven group table with custom finish and custom worksurface

2 M-Series Quad with custom shaped worksurface

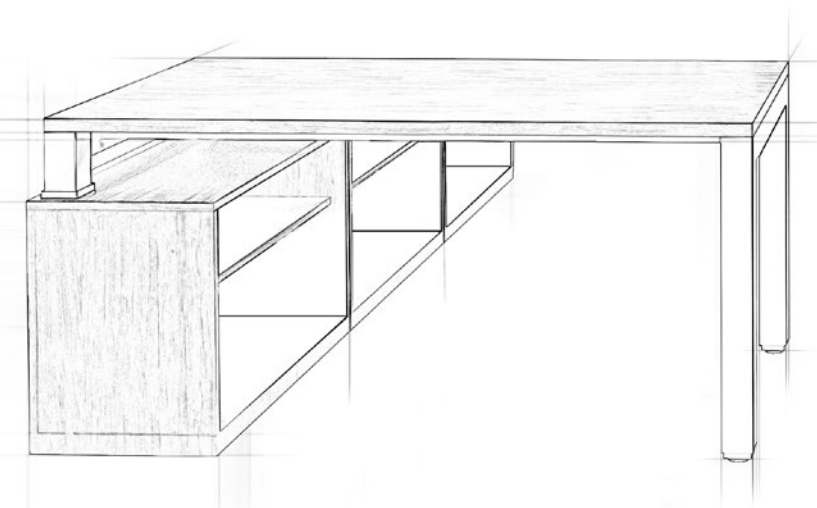

3 S-Collection workstation with custom panel integration

WHEN AND WHY TO ENGAGE WITH **EDS**

- Looking for an integrated solution with other “main line” products.
- A design problem needs to be solved and an off-the shelf product solution doesn't exist.
- Looking for a collaborative partnership and visibility to the creative process.
- Real time access to all facets of product execution with our in-house manufacturing, engineering and design capabilities.

Elle workstation integrated into storage

EDS EXAMPLE

REIMAGINED SOLUTIONS

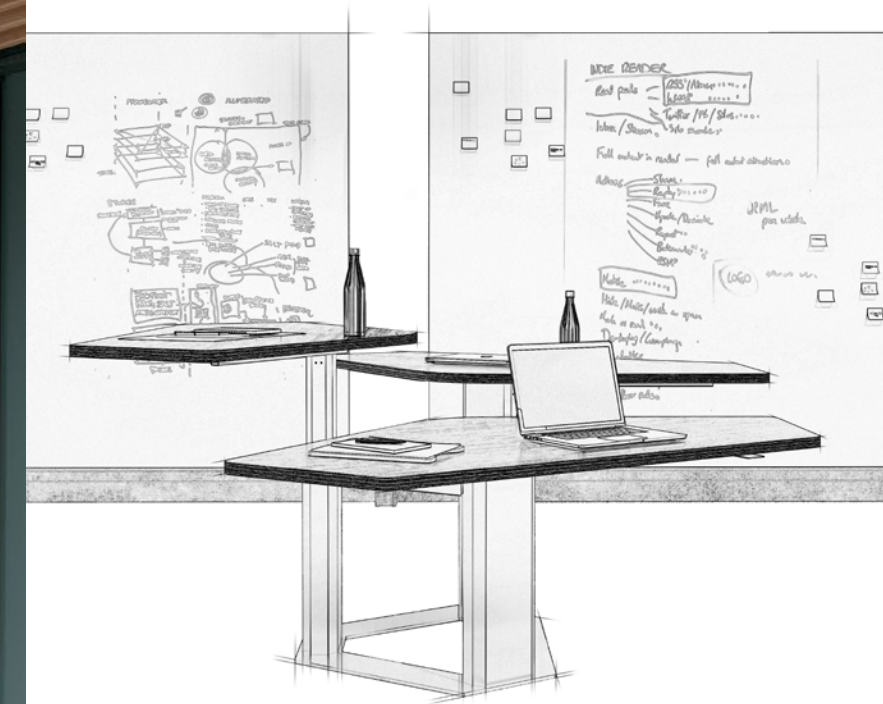

- S-Collection wall mounted workstation integrated with case goods
- Worksurfaces with custom finish

EDS EXAMPLE
