HUMAN ACTIVE TECHNOLOGY

ONE SYSTEM. ENDLESS CONFIGURATIONS.

Corva is a modular height-adjustable base system designed to adapt as work changes. Instead of replacing desks over time, Corva reconfigures, delivering category-leading performance, refined design, and built-in sustainability.

FEATURES

- **Fast Installation:** Engineered for speed with under-2-minute assembly, featuring a tool-less design up to the foot attachment for faster, simpler installation.
- **Safety:** Integrated dual anti-collision system helps detect obstacles during movement, protecting both users and surrounding objects.
- **Convenient Reset Access:** Both top and bottom reset options allow quick system resets.
- **Modern Rectangle Design:** A refined leg profile blends structural strength with softened curves, creating a clean aesthetic that integrates seamlessly into a wide range of workplace environments.
- **Configurable System Design:** 2-leg, 3-leg, and benching configurations can be converted between one another using shared components and minimal additional parts.
- **Lifecycle Sustainability:** By enabling reconfiguration instead of replacement, Corva reduces material waste and supports a longer product lifecycle.
