HUMAN ACTIVE TECHNOLOGY

MODULAR POWER MANAGEMENT.

Corva Power Beam is a modular power and cable management solution designed to integrate seamlessly within the Corva workspace ecosystem. Engineered for modern open-office planning, the Corva Power Beam combines organized cable routing, flexible power distribution, and scalable connector configurations into one clean solution.

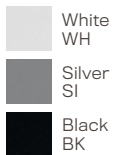

Designed to pair with Corva height-adjustable base, it keeps technology organized, wires off the floor, and collaborative environments visually streamlined while supporting adaptable workplace layouts and evolving technology needs.

FEATURES

- **Built for Open Office Environments:** Ideal for modern workplace planning, the Power Beam helps organize technology, power, and cable routing within open-plan layouts while maintaining a clean and refined appearance.
- **Curved Design Language:** Softened curves and a refined profile complement the Corva aesthetic, creating a cohesive visual connection between power management and the surrounding workspace system..
- **Integrated Cable Management:** Large internal cable routing capacity keeps wires organized, protected, and off the floor, supporting cleaner, safer, and more efficient workstation environments.
- **Electrical Compliance Ready:** Designed to support compliance with applicable state electrical regulations across a variety of workplace applications.
- **Configurable System:** Available with 180°, 120° and T, connector post options plus a power pole to support a wide range of modular workspace layouts and planning requirements.
